

Digicore Camera Firmware Update 1.19.2 to 1.19.10

Digicore are pleased to announce the latest firmware update which has been rolled out to all cameras. This update should significantly reduce the number of false positives and error messages.

Below you will find a detailed list of all the bug fixes and improvements.

1.19.10, 1.19.10 + audio - (Mar-10-2025)

Bug fixes

- Fixed an issue where the DVR loop deletion wasn't getting executed on some of the trips which had issues (fixed in APK version 1.19.9) with delayed trip start and stop.
- Fixed a corner case where some of the event-videos weren't sent to the server, resulting in trip uploaded webhook failure.

1.19.9, 1.19.9+audio - (Mar-06-2025)

Bug fixes

- Fixed an issue where in some of the Gemini firmware, one of the internal API was taking a long time resulting in delayed trip start and stop.

1.19.8, 1.19.8+audio - (Mar-05-2025)

Implemented fsync for DVR in Jimi devices at a 30-second interval.

Bug fixes

- Fixed an issue where the wrong ignition ID was mapped to trips.
- Resolved a bug where videos were uploaded instead of images for violations when eDVR was enabled.
- Fixed an issue where the first location of a trip was updated after 15 minutes in certain cases.
- Addressed a bug where the isEdvrStored key was missing in some violations, despite eDVR being captured.
- Fixed a bug in severity computation for drowsiness and cell phone distraction.

1.19.5, 1.19.5 + audio -(Jan-24-2025)

Bug fixes

- Bug fix in Live Telematics Events where "Vehicle-Ignition-On" and " Vehicle-Ignition-Off" events weren't sent.

1.19.4, 1.19.4+audio -(Jan-16-2025)

Added driver ID key in all health events.

Bug fixes

- Bug fix in Tail-Gating and Forward-Collision-Warning detections on JC450, due to the bug the events weren't getting detected.
- Bug fix in File upload service which happens occasionally in a very bad network area with multiple failed download attempts.
- Bug fix in NEW_DRIVER_ID audio announcement, which was not getting announced if there was no change in driverId.
- Fixed a rare bug where sometimes the Live-Telematics location was set with latitude and longitude as 0.
- Bug fix where the severity of Lizard Eye Distraction was not populated as part of the event.
- Bug fix in Lane Drift where on a few occasions it was generating multiple continuous false events.
- Bug fix for media not present for drowsiness, lizard eye and smoking violations
- Fixed an issue where images for speed sign detection on violation were not captured in some cases.
